

## **Jodi's Multiple Choice Frame Action**

Jodi's Multiple Choices Gallery Frame Action produces simple inner and outer borders in black. It will work on pictures in both portrait or landscape orientation. Use this gallery frame action before resizing for the web so that the frame looks best. You can turn on and off the inner and/or outer border for different looks, as well as change the color of the frame, add bevels, or add patterns

This action has been tested in Photoshop 7, CS, CS2 and CS3. If you know how to use actions in elements, it has also been tested in elements 3, 4 and 5.
