

CSpringer's Wrinkle and Blemish Repair

This action is similar to the second part of Chip's Skin Repair Action found immediately above. It fixes wrinkles and blemishes. This is not a substitute for the Skin Repair Action, since it does a different sort of repair.

To use it, you will have to download and install Polaroid's free Dust and Scratch Removal plug-in. Then install and run this action. Chip reports you will find many other uses for the Polaroid plug-in, such as cleaning dandruff/dust on clothes, damaged old photos, etc.
